What is the nature of the claim of the Samara family? Are the Samaras in possession of a title-deed.

2. I should be grateful if copies of the Kushans could be obtained and forwarded to this office.

Director of Agriculture
and Forests,
JERUSALEM.

SUBJECT :- El Magharah Forests - Tulkarem.

This forest is situated to the north of the Banah forest. Naher Iskandaroun runs between the forests; consists of about 1600 dunams all of it pure sand on which serris and carob grow. There is one plot of cultivated land amongst this forest to "Samara family".

2. Large area of this forest is under serris, which let grow purposely as a protection against movement of sand.

The boundaries of this forest are as follows:-

West:- The Mediteranean Sea.

South:- Following the mouth of River Iskandaroun from a point on the sea shore eastwards and then north east until it reaches a point on the sand dunes to the east.

East:- Start from a point on the sand dunes at the edge of the forest and the cultivated lands of wadi el Hawaris and the Government swamp of Sheikh Mohamed.

North:- Ard el Najeiaad, i.e. the Khuderah land and Birket Attah.

Samara family have a claim on this forest land.
In fact the whole of this forest is nothing but saris dunes with saris and with carob growing on it.

It is also recommended that it be included in the reserves and be gazetted accordingly, please.
